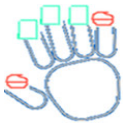
Special Hint Card

Thank you for your purchase of our products firstly, although our manufacture and testing conform to ISO9000 Standard fully, we hereby suggest you to reading the following Special Hint carefully before using, the following suggestion will improve your great efficiency and speed.

I、 Suggested Fingers:

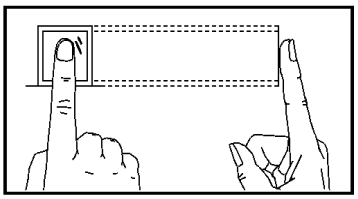


- ✧ Use index, middle or ring fingers.
- ✧ Avoid using thumb and pinky fingers since they a typically awkward to position consistently on the

II、 Finger Placement

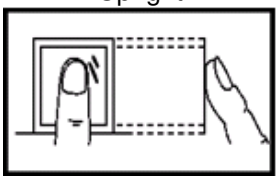
Completely covering the area of the sensor with the fingerprint will provide the best performance.

a) The correct way is :
   - Place a finger flat on the sensor surface
   - Place it to the center of the sensor surface.

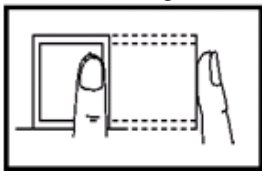


b) The wrong ways are:

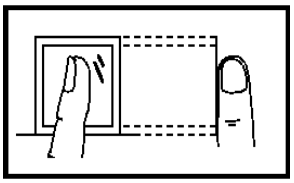
Upright



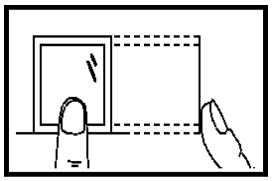
Left or Right



Askew



Partial



Note： Although our proprietary fingerprint algorithm is fully tolerant to fingerprint translation and rotation (360 Degree), it is commend to enroll fingerprint as the above suggesting ways.

III、 Avoiding the strong bright or other bad environment when installing.

Although the automated adjusting-exposure functions have been designed in strong bright environment, for example sunshine etc., we may not be sure that the machine will work fine fully.

Sunshine

Water

Collision

Bad Environment
